Italian

English (B2)

Profile

I'm a dynamic and ambitious person with a strong passion for computer science and a solid foundation in various technologies, both theoretical and practical. I'm proficient in programming languages like C++ and C#, and have developed personal projects as well as collaborated on open-source initiatives. I'm also very detail-oriented and precise in everything I do. I enjoy working in teams and am looking for an opportunity to apply my skills and grow professionally in a stimulating, ever-evolving environment.

Experience

2022- Present
Amazon PSR2
FC associate

The main tasks carried out are:
- Problem solver: analyzed and resolved inventory issues encountered by associates. Utilized Excel to track and address problems efficiently and accurately. Received deliveries and updated orders in the internal database to enable smooth order processing and fulfillment.
- AFM: managed preventive maintenance and troubleshot automated systems and equipment in the fulfillment center, ensuring smooth operations and minimizing downtime. Trained new team members, providing both practical and theoretical instruction to ensure operational effectiveness.

2019 - Present
Freelancer
Developer

I have experience in developing games, applications, and websites, using best practices to improve code, add new features, and troubleshoot issues. I have gained expertise in AI programming, animation, and code optimization. I provide detailed feedback on design and implementation, aiming to enhance the stability, usability, and architecture of code and applications.
